Diego **Zamboni**

ENTERPRISE SECURITY ARCHITECT · ENGINEERING LEADER · COMPUTER SCIENTIST

diego@zzamboni.org · zzamboni.org · zzamboni · zzamboni · zzamboni · zzamboni · zzamboni

Key skills

Leadership	29 years of multidisciplinary team and project leadership experience; IT Enterprise Architecture; Scaled Agile Framework (SAFe) Architect and Product Owner.
Computer Security	Enterprise security architecture; virtualization and cloud computing security; risk management and compliance; intrusion detection and prevention; operating systems and network security; software security and secure software development; CISSP certification.
Communications	Excellent written and spoken communication skills, extensive public speaking, writing and teaching experience.
Systems and Development	Unix/Linux systems engineering and administration, system health management and monitoring, cloud platforms, software development, configuration management.
Research	Ph.D. in Computer Science, 9 years of experience at IBM Research.

Professional highlights

- 18 years of experience in education and research, 11 years of industry experience.
- Management and leadership, IT security, cloud computing
  - Manage security architecture, risk management, data governance and compliance (ISO27001, ISAE3402/3000, etc.) for Swisscom's Cloud platforms.
  - Established and lead the Swisscom IT Clouds security community of practice.
  - Established and led the *Health and State Management* team at Swisscom to design, implement and operate a framework for scalable monitoring, logging and alerting for Swisscom's Cloud platforms.
  - Established and led the first computer security organization at UNAM, which has grown into the university's Information Security Coordination (UNAM-CERT).
  - Managed IT security customer relationships at HP Enterprise Services, including overseeing the activities of operational and engineering teams, risk and compliance management, requirements discussion and reporting.
  - Managed the CFEngine language product roadmap.
- Research, architecture and design
  - Designed the *Orchard* monitoring framework for Swisscom's *Application Cloud* platform, and led the team that implemented it and brought it into production.
  - Designed and implemented the *Billy Goat* malware capture and analysis system at IBM.
- Communications and community
  - Author of multiple books including *Learning CFEngine*, *Learning Hammerspoon* and *Literate Configuration*.
  - Program chair and program committee member for multiple conferences including the RAID symposium, DIMVA conference, the *Computer Security Day* and *Computer Security* conference at UNAM, and others.
  - Member of the Editorial Board of the Computers & Security Journal.

Experience

Swisscom

2015 – Present *Switzerland*

Enterprise Architect and IT Clouds Solution Security Architect *Apr 2019 – Present*

- As an *Enterprise Architect*, I participate in the design of future products and solutions offered by Swisscom, in collaboration with architects from all other divisions of the company.
- As *Solution Security Architect for Swisscom's Cloud Platforms* —which include *Enterprise Service Cloud*, *Enterprise Application Cloud*, *Dynamic Computing Services*, *Enterprise Cloud for SAP Applications* and related services— I am responsible for the security, compliance and data governance of those services. I define, prioritize and drive relevant product features and business goals. I also lead the IT Clouds Security Community of Practice and advise engineering teams on compliance, governance and operational activities.
- Selected achievements and activities:
  - Ensure cloud platform and service compliance with internal, contractual and regulatory standards, including ISO27001, ISAE3402/3000 and GDPR.
  - Establish and currently lead a community of around 30 *Security Champions* from different teams, who drive security initiatives and promote the security culture within the Swisscom IT Clouds organization.
  - Coordinate threat modelings, audits, penetration tests and security compliance reporting.
  - Coordinate organization- and team-wide processes for risk and vulnerability management.
  - Development of the Swisscom *Platforms* vision for 2025.

Team Lead & Product Owner for Health & State Management *Mar 2016 – Apr 2019*

- I built and led a team which evolved on par with Swisscom cloud platforms to provide their monitoring and logging capabilities. My responsibilities included people management (up to 16 people), definition and prioritization of requirements and roadmaps (in collaboration with Product Managers and other stakeholders), technical architecture, and managing the planning and execution of team activities.
- Selected achievements:
  - Led the transition of the *Enterprise Cloud* LEMM (Logging, Event Management and Monitoring) and Access & Inventory frameworks into maintenance mode as the platform was retired.
  - Defined the scope and mission of the Health and State Management (HSM) team as part of the new *Enterprise Service Cloud* project, and later of other platforms as the *IT Clouds* scope expanded to *Application Cloud*, *Enterprise Cloud for SAP Solutions* and *Dynamic Computing Services*.
  - Defined the logging and monitoring architecture for the *Enterprise Service Cloud* platform based on VMware vRealize Operations and vRealize Log Insight.
  - Led the transition of the *Application Cloud* platform monitoring from the Orchard framework to a TICK-based framework.
  - Defined architecture and oversaw implementation of the Customer Log Forwarding service.
  - Managed business relationship and technical implementation of OpsGenie for alert management in IT Clouds.
- Main technologies involved: VMware vSphere (ESX, vCenter, NSX), VMware vRealize Operations Manager and Log Insight, Ansible (configuration management), OpsGenie (alert management).

Cloud Architect and Orchard Project Lead *Aug 2015 – Mar 2016*

- Managed a team of three people and led the *Orchard* project through its implementation, production release and further improvements and development.

Swisscom Cloud Lab

2014 – 2015 *U.S.A. (remote)*

Senior Platform Architect *Aug 2014 – Jul 2015*

- Designed the architecture and implemented the initial prototype for the *Orchard* health-management and self-healing framework for Swisscom's *Application Cloud* Platform-as-a-Service service.
- Main technologies involved: OpenStack (cloud computing infrastructure), Cloud Foundry (application platform), Consul (health management and service discovery), RabbitMQ (message bus), Riemann (event analysis).

CFEngine AS

2011 – 2014 *Norway/U.S.A. (remote)*

Product Manager *Aug 2013 – Jun 2014*

- Managed the CFEngine language roadmap.
- Coordinated the CFEngine Design Center project.
- Coordinated the work on CFEngine third-party integration (e.g. AWS EC2, VMware, Docker and OpenStack).
- Developed code for both the Design Center core and its integrations.

Senior Security Advisor *Oct 2011 – Jun 2014*

- CFEngine Advocate, with a special focus on security.
- Wrote the book *Learning CFEngine 3*, published by O'Reilly Media, which became the de facto introductory text to CFEngine.
- Gave talks, wrote articles and blog posts, taught classes, and in general spread the word about CFEngine.
- Developed and implemented the strategy for CFEngine as a security component.

Boundless Innovation and Technology *2012 – 2014* *Mexico*

Cofounder, Head of Research and Training *Jul 2012 – Jul 2014*

- I advised and coordinated teams working on teaching- and security-related products, consulting and services.

HP Enterprise Services *2009 – 2011* *Mexico*

Account Security Officer *Oct 2010 – Oct 2011*

- Acted as first point of contact for all security-related issues for five HP enterprise customers in Mexico.
- Initiated, advised and managed security-related projects.
- Handled communication and coordination between technical teams involved in security initiatives.
- Involved in all security-related decisions at the sales, design, implementation, delivery and ongoing maintenance stages of IT Outsourcing projects.

IT Outsourcing Service Delivery Consultant *Nov 2009 – Oct 2010*

- Helped multidisciplinary customer teams (software engineering, IT management, networking, sales and support) by solving complex problems in customer environments.
- Performed analysis, design and implementation of solutions in multiple areas of expertise, including system automation, configuration management, system administration, system design, virtualization, performance and security.

IBM Zurich Research Lab *2001 – 2009* *Switzerland*

Research Staff Member *Oct 2001 – Oct 2009*

- I was a member of the *Global Security Analysis Laboratory* (GSAL), where I worked in intrusion detection, malware detection and containment, and virtualization security research projects.
- See *Research* for details of my research.

Sun Microsystems *1997* *U.S.A.*

Developer (Intern) *May 1997 – Aug 1997*

- Developer for the *Bruce* host vulnerability scanner, later released as the Sun Enterprise Network Security Service (SENSS).
- Designed and implemented the first version of the network-based components of *Bruce*, which allowed it to operate on several hosts in a network, controlled from a central location.

National Autonomous University of Mexico (UNAM) *1991 – 1996* *Mexico*

Head of Computer Security Area *Aug 1995 – Aug 1996*

- Founded UNAM's *Computer Security Area*, the University's first team dedicated to computer security, which has evolved into the *Information Security Coordination (UNAM-CERT)*.
- Managed up to nine people working on different projects related to computer security.
- Managed security monitoring for a Cray supercomputer and 22 Unix workstations.
- Provided security services to the whole University, including incident response, security information, auditing and teaching.
- Established the celebration of the *International Computer Security Day* (sponsored by the Association for Computing Machinery) at UNAM. Acted as the main organizer of the event for two years (1994 and 1995). This event has grown and evolved into the *Computer Security Day* and the *Computer Security Congress*.
- Designed and headed development of an audit-analysis tool for Unix systems (SAINT) [24].

System Administrator *Nov 1991 – Aug 1995*

- System administrator at UNAM's Supercomputing Center, managing a Cray Y-MP Supercomputer and related systems.
- Managed the Network Queuing Subsystem (NQS),
- Managed and provided support for 22 Unix workstations.
- Monitored the security of the Cray supercomputer and related workstations.
- Other responsibilities: user administration, operating system installation, resource management, security policies.

Education

Ph.D. in Computer Science

West Lafayette, IN, U.S.A.

Purdue University

Aug 1996 – Aug 2001

- Thesis title: *Using Internal Sensors for Computer Intrusion Detection*.
- Advisor: Eugene H. Spafford.

M.S. in Computer Science

West Lafayette, IN, U.S.A.

Purdue University

Aug 1996 – May 1998

- Advisor: Eugene H. Spafford.

Bachelor's degree in Computer Engineering

Mexico City, Mexico

National Autonomous University of Mexico (UNAM)

Aug 1989 – Jul 1995

- Thesis title: UNAM/Cray Project for Security in the Unix Operating System (in Spanish, original title: *Proyecto UNAM/Cray de Seguridad en el Sistema Operativo Unix*).

Languages

Spanish	native
English	full professional proficiency
German	basic proficiency (B1 level)

Certifications

Certified Information Systems Security Professional (CISSP)

April 2019

$(ISC)^2$, the International Information System Security Certification Consortium

The vendor-neutral CISSP credential confirms technical knowledge and experience to design, engineer, implement, and manage the overall security posture of an organization. Required by the world's most security-conscious organizations, CISSP is the gold-standard information security certification that assures information security leaders possess the breadth and depth of knowledge to establish holistic security programs that protect against threats in an increasingly complex cyber world.

SAFe® 4 Certified Product Owner/Product Manager

July 2017 (not renewed)

Scaled Agile Inc.

A SAFe® 4 Certified Product Owner/Product Manager is a SAFe professional who works with customers and development organizations to identify and write requirements. Key areas of competency include identifying customer needs, writing epics, capabilities, features, stories, and prioritizing work in order to effectively deliver value to the enterprise.

Research

(see "Publications" for publication reference details)

Selected research projects at IBM

Phantom

2008 – 2009

- Security for VMware virtual environments using virtual machine introspection (based on the VMware VMsafe API) to provide intrusion detection and prevention capabilities.
- Publications: [13].

Billy Goat: Active worm detection and capture *2002 – 2008*

- Billy Goat was the first instance of what is today called *honeypots* and *honeynets*.
  - An active worm-detection system, widely deployed (at the time) in the IBM worldwide internal network. It listens for connections to unused IP address ranges and actively responds to those connections to accurately detect worm-infected machines, and in many cases capture the worms themselves. Billy Goat is engineered for distributed deployment, with each device containing standalone detection and reporting capabilities, together with data centralization features that allow network-wide data analysis and reporting.
- Publications: [18, 25]

Router-based Billy Goat *2005 – 2007*

- An active worm-capture device deployed at the network boundary and coupled with the border router, that allows the Billy Goat to effectively and automatically spoof every unused IP address outside the local network. This makes it possible for the Router-based Billy Goat to accurately detect local infected machines and prevent them from establishing connections to the outside, limiting the propagation of the worms to the outside network.
- Publications: [16]

SOC in a Box *2005 – 2007*

- Integrated device containing multiple security tools: intrusion detection, worm detection, vulnerability scanning and network discovery. Precursor to what is today called *Unified Threat Management* systems.

Exorcist *2001 – 2002*

- Host-based, behavior-based intrusion detection using sequences of system calls.

Ph.D. Thesis Research

Using internal sensors and embedded detectors for intrusion detection

- Study of data collection methods for intrusion detection systems.
- Implementation of novel methods for data collection in intrusion detection systems.
- Analysis of the properties, advantages and disadvantages of internal sensors and embedded detectors as data collection and analysis elements in intrusion detection systems.
- Publications: [11, 19, 20, 27, 32]

Additional research projects

Using autonomous agents for intrusion detection

- Design and documentation of an architecture (AAFID) to perform distributed monitoring and intrusion detection using autonomous agents.
- Implementation of a prototype according to the architecture. This prototype is published as open source.
- Exploration of research issues in the distributed intrusion detection area.
- Publications: [21, 22, 28, 35, 33, 34].

Analysis of a denial-of-service attack on TCP/IP (Synkill)

- Collaborated in the analysis of the SYN-flooding denial-of-service attack against TCP and in the implementation of a defense tool.
- Publications: [23], awarded the 2020 IEEE Security & Privacy Test of Time Award.

System Development and Management

Programming languages	Ruby, Python, C, Perl, Java, LISP family (Clojure, Racket), AWK, Unix shells.
Development environments	Unix/Linux, Cloud Foundry, Amazon EC2, macOS.
Unix system administration	Linux (multiple distributions), OpenBSD, FreeBSD, macOS, Solaris.
Configuration management	CFEngine, Puppet, Chef, Ansible.
Virtualization, containers and cloud	VMWare (ESX, vSphere), OpenStack, Amazon EC2, Docker, Cloud Foundry.
Health Management and Monitoring	VMware vRealize Operations Manager, vRealize Log Insight, Nagios, Icinga.
Other technologies	REST APIs, Riemann (event stream processing), XML and related technologies, network programming, database programming (SQL), kernel programming (OpenBSD and Linux), HTML.

Software Development Projects

Publicly available software projects: see https://github.com/zzamboni/ and https://gitlab.com/zzamboni

Other software projects (not publicly available)

Pilatus (IBM) *2005 – 2007*

A system installer that allows arbitrary system installation and configurations, allowing for both proprietary and open source components to be installed in an automated fashion. Open source components can be downloaded directly from their original source to avoid distributing them.

SOC in a Box (IBM) *2005 – 2007*

A specialized Linux distribution containing multiple security services for integrated security monitoring in small and medium networks. Implementation includes also backend infrastructure components for system installation, configuration and upgrade; and data centralization, analysis and reporting.

Billy Goat (IBM) *2002 – 2007*

A specialized Linux distribution containing multiple sensors for detection of large-scale automated attacks. Implementation includes also backend infrastructure components for system configuration and upgrade, data centralization, analysis and reporting.

Embedded Sensors Project (Purdue University) *1999 – 2001*

A system of sensors for intrusion detection developed in OpenBSD through code instrumentation. Developed as part of my Ph.D. thesis work.

Honors & Awards

May 2020	**IEEE Security & Privacy Test of Time Award (IEEE S&P page, CERIAS blog post),** IEEE	*U.S.A.*
2010	**CFEngine Champion,** CFEngine AS	*Norway*
Jul 2001	**Josef Raviv Memorial Postdoctoral Fellowship,** IBM	*U.S.A.*
Apr 2001	**Member of Phi Beta Delta,** honor society recognizing scholarly achievement	*U.S.A.*
Sep 2000	**UPE Microsoft Scholarship Award,** honor society recognizing scholarly achievement	*U.S.A.*
Apr 1998	**Member of Upsilon Pi Epsilon,** the ACM Computer Sciences honor society	*U.S.A.*
May 1996	**Fulbright Scholarship,** for pursuing Ph.D. studies at Purdue University	*Mexico*

Program Committees and Boards

2011–2013	**Editorial Board Member,** Computers & Security Journal	
2007–2017	**Steering Committee Member,** Intl. Symposium on Recent Advances in Intrusion Detection	
2006	**Program Chair,** 9th Intl. Symposium on Recent Advances in Intrusion Detection (RAID)	*Germany*
2001–2005	**Program Committee Member,** Intl. Symposium on Recent Advances in Intrusion Detection	
2009	**Program Co-chair,** IBM Academy of Technology Security and Privacy Symposium	
2009	**Program Chair,** ZISC Workshop on Security in Virtualized Environments and Cloud Computing	*Switzerland*
2008	**Program Chair,** Detection of Intrusions and Malware & Vulnerability Assessment (DIMVA)	*France*
2007	**Program Committee Member,** IEEE Security and Privacy Symposium	*U.S.A.*
2003–2007	**Program Committee Member,** Annual Computer Security Applications Conference (ACSAC)	
1994–2000	**Program Committee Member,** Computer Security Day Conference	*Mexico*
1994–1995	**Founder and organizer,** Computer Security Day Conference	*Mexico*

Teaching and Advising

Students

Daniele Sgandurra, University of Pisa, Italy *Internship advisor* *2009*

- Project: Design and implementation of process injection using virtual machine introspection.

Martin Carbone, Georgia Institute of Technology, U.S.A.	*Internship advisor*	*2007*

Project: Implementation of a proof of concept Hyperjacking attack on Intel platform.

Urko Zurutuza Ortega, Mondragon University, Spain	*Ph.D. co-advisor*	*2005 – 2008*

- Thesis: Data Mining Approaches for Analysis of Worm Activity Towards Automatic Signature Generation

Milton Yates, ENST Bretagne, France	*External Diploma Thesis advisor*	*2005*

- Thesis: The Router-based Billy Goat Project

Candid Wüest, ETH Zurich, Switzerland	*Diploma Thesis tutor*	*2002 – 2003*

- Thesis: Desktop Firewalls and Intrusion Detection

Teaching

CISSP training (30 hours)	*iNetworks, Mexico (remote class)*	*2020*
CFEngine one-day training class (8 hours)	*Multiple venues*	*2011 – 2013*
"Virtualization" lecture (2 hours), Systems Security class, Computer Science Dept.	*ETH Zürich*	*2011 – 2013*
"Intrusion detection: Basic concepts and current research at IBM" class (3 hours), Information Technology Security Spring School	*University of Lausanne*	*2005*
"Introduction to Computer Security" class (40 hours)	*ITESM, Mexico*	*2003*
EE495 ("Information Extraction, Retrieval and Security") course	*Purdue University, U.S.A.*	*2000*

- Co-designed eight security-related lectures and taught two of them.
- Co-designed the class project.

"SSH: Achieving secure communication over insecure channels" class	*CSI NetSec conference, U.S.A.*	*2000*
"Protecting your computing system" class	*Schlumberger, U.S.A.*	*1997*
Supercomputing Internship Program Courses	*UNAM, Mexico*	*1991 – 1996*

- Designed and taught multiple courses (10–40 hours long) on the following topics:
  - Introduction to Unix
  - Unix utilities
  - Unix security
  - Basic Unix administration
  - Advanced Unix administration
  - UNICOS system administration on Cray supercomputers

Other Professional Activities

1998–	**The Association for Computing Machinery (ACM)**, Member	
2000	**Purdue.pm, the Purdue Perl Users Group**, Founder	*U.S.A.*
1999	**Purdue University Chapter of Upsilon Pi Epsilon**, President	*U.S.A.*
1998	**Purdue University Chapter of Upsilon Pi Epsilon**, Secretary	*U.S.A.*

Online proceedings, available at http://www.raid-symposium.org/raid99/. West Lafayette, IN, Sept. 1999. URL: https://www.cerias.purdue.edu/apps/reports_and_papers/view/3487.

[35] Eugene H. Spafford and Diego Zamboni. "AAFID: Autonomous Agents for Intrusion Detection". In: *Proceedings of the First International Workshop on Recent Advances in Intrusion Detection (RAID98)*. Online proceedings, available at http://www.raid-symposium.org/raid98/. Louvain-la-Neuve, Belgium, Sept. 1998.

Invited Talks and Articles

[36] Mark Burgess and Diego Zamboni. "CFEngine's Decentralized Approach to Configuration Management". In: *InfoQ* (June 2014). URL: http://www.infoq.com/articles/cfengine-view-on-it-automation.

[37] Diego Zamboni. *Security in the Third Wave of IT Engineering*. Keynote talk, presented at the 2011 Computer Security Congress in Mexico City. Nov. 2011. URL: https://zzamboni.org/post/security-in-the-third-wave-of-it-engineering/.

[38] Martim Carbone, Diego Zamboni, and Wenke Lee. "Taming Virtualization". In: *IEEE Security and Privacy* 6.1 (2008), pp. 65–67. ISSN: 1540-7993. URL: https://ieeexplore.ieee.org/document/4446700.

[39] Diego Zamboni. *From Intrusion Detection to Remediation and Beyond: Evolution, Trends, and Research at IBM*. Invited talk at the annual meeting of the Swiss Chapter of the Sigma XI Honorary Scientific Society. Nov. 2006.

[40] James Riordan, Andreas Wespi, and Diego Zamboni. "How to Hook Worms". In: *IEEE Spectrum* (May 2005). URL: https://spectrum.ieee.org/computing/networks/how-to-hook-worms.

[41] Diego Zamboni. *Intrusion what? From detection to prevention and beyond*. Talk at the Zurich Information Security Center Information Security Colloquium. Dec. 2005.

[42] James Riordan and Diego Zamboni. "Billy Goat Detects Worms and Viruses". In: *ERCIM News* 56 (Jan. 2004). URL: http://www.ercim.org/publication/Ercim_News/enw56/riordan.html.

[43] Diego Zamboni. Diez Años de Aciertos y Fallas — ¿Qué Hemos Aprendido y Qué nos Depara el Futuro en la Seguridad? *(Ten years of hits and misses — what have we learned, and what does the future in security hold for us?)* Keynote talk, presented at the 2004 Computer Security Congress in Mexico City. May 2004.

[44] Diego Zamboni. "*Avances en el sistema y arquitectura AAFID para detección de intrusos* (Advances in the AAFID intrusion detection architecture and system)". In: *Proceedings of the 1999* Día Internacional de la Seguridad en Cómputo *(International Computer Security Day) conference*. Mexico City, Mexico, Oct. 1999.

[45] Diego Zamboni. "AAFID: *Detección de Intrusos usando Agentes Autónomos* (Intrusion Detection using Autonomous Agents)". In: *Proceedings of the 1998* Día Internacional de la Seguridad en Cómputo *(International Computer Security Day) conference*. Mexico City, Mexico, Nov. 1998.

Patents

[46] Carbone Martim et al. "Hardware Emulation Using On-the-fly Virtualization". Granted Patent US 9250942 B2 (United States). Feb. 2, 2016. URL: https://lens.org/107-038-681-631-856.

[47] Jansen Bernhard et al. "Secure User Interaction Using Virtualization". Granted Patent US 8516564 B2 (United States). Aug. 20, 2013. URL: https://lens.org/012-709-360-909-626.

[48] Zamboni Diego M et al. “Detection And Control Of Peer-to-peer Communication”. Patent Family of US 8219679 B2 (United States, others). July 10, 2012. URL: https://lens.org/151-595-773-205-878.

[49] Riordan James F, Rissmann Ruediger, and Zamboni Diego M. “IP Network Management Based On Automatically Acquired Network Entity Status Information”. Patent Family of US 8055751 B2 (United States, others). Nov. 8, 2011. URL: https://lens.org/065-534-634-366-763.

[50] Duponchel Yann et al. “Methods For Operating Virtual Networks, Data Network System, Computer Program And Computer Program Product”. Patent Family of US 7908350 B2 (United States, others). Mar. 15, 2011. URL: https://lens.org/080-322-567-493-840.

[51] Rissmann Ruediger et al. “Network Attack Detection”. Patent Family of EP 1866725 B1 (European Patent Office, others). Oct. 20, 2010. URL: https://lens.org/044-792-433-937-531.

[52] Duponchel Yann et al. “Method For Operating Several Virtual Networks”. Patent Family of EP 1969777 B1 (European Patent Office, others). Jan. 27, 2010. URL: https://lens.org/159-743-880-849-911.

[53] Swimmer Morton D, Wespi Andreas, and Zamboni Diego M. “Preventing Attacks In A Data Processing System”. Granted Patent US 7555777 B2 (United States). June 30, 2009. URL: https://lens.org/077-245-544-178-974.

[54] Schuba Christoph L et al. “Network Protection For Denial Of Service Attacks”. Granted Patent US 6725378 B1 (United States). Apr. 20, 2004. URL: https://lens.org/009-701-089-204-105.
