

# Diego Zamboni

SECURITY ARCHITECT · ORGANIZATIONAL LEADER · COMPUTER SCIENTIST

✉ dzamboni@amazon.com · 🏠 zzamboni.org · 📞 zzamboni · 🌐 zzamboni · 📺 zzamboni · 📺 dzamboni

## Key skills

- Leadership** 32 years of multidisciplinary team and project leadership experience; IT Enterprise Architecture; [Scaled Agile Framework \(SAFe\)](#) experience.
- Communications** Excellent written and spoken communication skills, extensive public speaking, writing and teaching experience.
- Cloud Computing** AWS architecture, infrastructure, development and security. Holder of 6 AWS certifications.
- Computer Security** Enterprise security architecture; virtualization and cloud computing security; risk management and compliance; intrusion detection and prevention; software security and secure software development; [CISSP](#) certification.
- Research** Ph.D. in Computer Science, 9 years of experience at IBM Research.
- Languages** Spanish (native), English (100%), German (B1 level).

## AWS experience highlights

- **Senior Global Security Architect, L6, joined September 2021.**
- **Lead Security Architect** at the Stellantis Kinetic *Virtual Engineering Workbench* (VEW) project [USD 16.5M] - July 2022 to date. CSAT 10/10 (Mar. 2023).
  - Established the VEW security workstream, which identifies customer security requirements, defines security best practices and drives the risk analysis, threat modeling and mitigation implementation activities across all 6 development workstreams, working with Stellantis stakeholders including the CISO, Security Architects, Governance and Compliance team, and Cloud Foundations team, as well as the project business sponsors and product owners.
  - Implemented measurement mechanisms with a *Security Dashboard* which tracks status and metrics for security activities, and is reviewed weekly in workstream 2x2s and in the program-level MBR.
  - Created a *Security Champions* community to promote, educate and transfer security knowledge.
  - Drove the customer security signoff process towards initial VEW go-live on April 3rd 2023 and Smart Cockpit go-live on April 26th 2023.
- **Security Consultant** at the Volkswagen Digital Production Platform (DPP) [USD 100.2M] program - December 2021-July 2022.
  - Established the *Partner Security Workstream* and implemented scalable, durable mechanisms to enable DPP partners to work securely in the DPP program. Enabled the work of 7 partners across 15 DPP use case projects.
  - Created and promoted *Security Learning Paths* and *Step-by-step guides* across various DPP roles, including 3 partner-specific roles.
  - Grew the *DPP Security Guardian* program from 18 to 118 security guardians across 178 projects.
- Mentored 4 candidates in Cohort 13 of the Security Area of Depth (AoD), acted as evaluator for 8 security checkrides, conducted 22 interviews.
- Member of the *Security & Compliance TFC* and the *AWSi Delivery Excellence Office Tiger Team*.
- Certified as *Security Bar Raiser* and *Qualified Deliverable Security Reviewer*.

## Other Professional highlights

- Management and leadership, IT security, cloud computing
  - Managed security architecture, risk management, data governance and compliance (ISO27001, ISAE3402/3000, etc.) for [Swisscom's Cloud platforms](#).
  - Established and led the Swisscom IT Clouds security community of practice.
  - Established and led the *Health and State Management* team at Swisscom to design, implement and operate a framework for scalable monitoring, logging and alerting for Swisscom's Cloud platforms.
  - Established and led the first computer security organization at UNAM, which has grown into the university's [Information Security Coordination \(UNAM-CERT\)](#).
  - Managed IT security customer relationships at HP Enterprise Services, including overseeing the activities of operational and engineering teams, risk and compliance management, requirements discussion and reporting.
  - Managed the CFEngine language product roadmap.
- Research, architecture and design
  - Designed the *Orchard* monitoring framework for Swisscom's *Application Cloud* platform, and led the team that implemented it and brought it into production.
  - Designed and implemented the *Billy Goat* malware capture and analysis system at IBM.
- Communications and community
  - Author of multiple books including [Learning CFEngine](#), [Learning Hammerspoon](#) and [Literate Configuration](#).
  - [Program chair and program committee member for multiple conferences](#) including the RAID symposium, DIMVA conference, the *Computer Security Day* and *Computer Security* conference at UNAM, and others.
  - Member of the Editorial Board of the *Computers & Security Journal*.

## Experience

### Amazon Web Services

2021 – Present

Switzerland

SENIOR GLOBAL SECURITY ARCHITECT

Oct 2021 – Present

- I work with customers and within AWS to increase security awareness, design and build secure solutions, mentor and develop colleagues and customers in security best practices.
- As Lead Security Architect at the [Stellantis Virtual Engineering Workbench](#) (VEW) project, I have:
  - Established the VEW security workstream to identify customer security requirements and policies, define and promote security best practices and drive activities related to risk analysis, threat modeling and mitigation definition, prioritization and implementation.
  - Established measurement mechanisms for status and metrics for security activities, which provide visibility to both technical and business stakeholders.
  - Established a *Security Champions* program to promote and transfer security knowledge.
  - Defined and tracked implementation of security features to fulfill both customer business requirements and AWS best practices.

GLOBAL SECURITY ARCHITECT

Sep 2021 – Sep 2022

- Worked with AWS global customers to improve security posture and promote secure design and implementation practices.
- In the [Volkswagen Digital Production Platform \(DPP\)](#) program, I established scalable and durable mechanisms to enable DPP partners to work securely in the DPP program. I also created and promoted security learning materials tailored for various roles within the project, and increased security awareness and knowledge by promoting a *Security Guardians* initiative across the organization.

- As an *Enterprise Architect*, I participated in the design of future products and solutions offered by Swisscom, in collaboration with architects from all other divisions of the company.
- As *Solution Security Architect for [Swisscom's Cloud Platforms](#)* —which include *Enterprise Service Cloud*, *Enterprise Application Cloud*, *Dynamic Computing Services*, *Enterprise Cloud for SAP Applications* and related services— I was responsible for the security, compliance and data governance of those services. I defined, prioritized and drove relevant product features and business goals. I also lead the IT Clouds Security Community of Practice and advised engineering teams on compliance, governance and operational activities.
- Selected achievements and activities:
  - Ensured cloud platform and service compliance with internal, contractual and regulatory standards, including ISO27001, ISAE3402/3000 and GDPR.
  - Established and led a community of around 30 *Security Champions* from different teams, who drove security initiatives and promote the security culture within the Swisscom IT Clouds organization.
  - Coordinated threat modelings, audits, penetration tests and security compliance reporting.
  - Coordinated organization- and team-wide processes for risk and vulnerability management.
  - Development of the Swisscom *Platforms* vision for 2025.

- I built and led a team which evolved on par with Swisscom cloud platforms to provide their monitoring and logging capabilities. My responsibilities included people management (up to 16 people), definition and prioritization of requirements and roadmaps (in collaboration with Product Managers and other stakeholders), technical architecture, and managing the planning and execution of team activities.
- Selected achievements:
  - Led the transition of the *Enterprise Cloud* LEMM (Logging, Event Management and Monitoring) and Access & Inventory frameworks into maintenance mode as the platform was retired.
  - Defined the scope and mission of the Health and State Management (HSM) team as part of the new *Enterprise Service Cloud* project, and later of other platforms as the *IT Clouds* scope expanded to *Application Cloud*, *Enterprise Cloud for SAP Solutions* and *Dynamic Computing Services*.
  - Defined the logging and monitoring architecture for the *Enterprise Service Cloud* platform based on VMware vRealize Operations and vRealize Log Insight.
  - Led the transition of the *Application Cloud* platform monitoring from the Orchard framework to a TICK-based framework.
  - Defined architecture and oversaw implementation of the Customer Log Forwarding service.
  - Managed business relationship and technical implementation of OpsGenie for alert management in IT Clouds.
- Main technologies involved: VMware vSphere (ESX, vCenter, NSX), VMware vRealize Operations Manager and Log Insight, Ansible (configuration management), OpsGenie (alert management).

- Managed a team of three people and led the *Orchard* project through its implementation, production release and further improvements and development.

## Swisscom Cloud Lab

2014 – 2015

U.S.A. (remote)

- Designed the architecture and implemented the initial prototype for the *Orchard* health-management and self-healing framework for Swisscom's *Application Cloud* Platform-as-a-Service service.
- Main technologies involved: OpenStack (cloud computing infrastructure), Cloud Foundry (application platform), Consul (health management and service discovery), RabbitMQ (message bus), Riemann (event analysis).

## CFEngine AS

2011 – 2014

Norway/U.S.A. (remote)

- Managed the CFEngine language roadmap.
- Created and led the *CFEngine Design Center* project, which was the foundation for the current *CFEngine Build* service.
- Coordinated the work on CFEngine third-party integration (e.g. AWS EC2, VMware, Docker and OpenStack).
- Developed code for both the Design Center core and its integrations.

- CFEngine Advocate, with a special focus on security.
- Wrote the book *Learning CFEngine 3*, published by O'Reilly Media, which became the de facto introductory text to CFEngine.
- Gave talks, wrote articles and blog posts, taught classes, and in general spread the word about CFEngine.
- Developed and implemented the strategy for CFEngine as a security component.

## Boundless Innovation and Technology

2012 – 2014

Mexico

COFOUNDER, HEAD OF RESEARCH AND TRAINING

Jul 2012 – Jul 2014

- I advised and coordinated teams working on teaching- and security-related products, consulting and services.

## HP Enterprise Services

2009 – 2011

Mexico

ACCOUNT SECURITY OFFICER

Oct 2010 – Oct 2011

- Acted as first point of contact for all security-related issues for five HP enterprise customers in Mexico.
- Initiated, advised and managed security-related projects.
- Handled communication and coordination between technical teams involved in security initiatives.
- Involved in all security-related decisions at the sales, design, implementation, delivery and ongoing maintenance stages of IT Outsourcing projects.

IT OUTSOURCING SERVICE DELIVERY CONSULTANT

Nov 2009 – Oct 2010

- Helped multidisciplinary customer teams (software engineering, IT management, networking, sales and support) by solving complex problems in customer environments.
- Performed analysis, design and implementation of solutions in multiple areas of expertise, including system automation, configuration management, system administration, system design, virtualization, performance and security.

## IBM Zurich Research Lab

2001 – 2009

Switzerland

RESEARCH STAFF MEMBER

Oct 2001 – Oct 2009

- I was a member of the [Global Security Analysis Laboratory](#) (GSAL), where I worked in intrusion detection, malware detection and containment, and virtualization security research projects.
- See [Research](#) for details of my research.

## Sun Microsystems

1997

U.S.A.

DEVELOPER (INTERN)

May 1997 – Aug 1997

- Developer for the *Bruce* host vulnerability scanner, later released as the [Sun Enterprise Network Security Service](#) (SENSS).
- Designed and implemented the first version of the network-based components of *Bruce*, which allowed it to operate on several hosts in a network, controlled from a central location.

## National Autonomous University of Mexico (UNAM)

1991 – 1996

Mexico

HEAD OF [COMPUTER SECURITY AREA](#)

Aug 1995 – Aug 1996

- Founded UNAM's *Computer Security Area*, the University's first team dedicated to computer security, which has evolved into the [Information Security Coordination \(UNAM-CERT\)](#).
- Managed up to nine people working on different projects related to computer security.
- Managed security monitoring for a Cray supercomputer and 22 Unix workstations.
- Provided security services to the whole University, including incident response, security information, auditing and teaching.
- Established the celebration of the *International Computer Security Day* (sponsored by the Association for Computing Machinery) at UNAM. Acted as the main organizer of the event for two years (1994 and 1995). This event has grown and evolved into the [Computer Security Day](#) and the [Computer Security Congress](#).
- Designed and headed development of an audit-analysis tool for Unix systems (SAINT) [24].

SYSTEM ADMINISTRATOR

Nov 1991 – Aug 1995

- System administrator at UNAM's Supercomputing Center, managing a [Cray Y-MP Supercomputer](#) and related systems.
- Managed the Network Queuing Subsystem (NQS),
- Managed and provided support for 22 Unix workstations.
- Monitored the security of the Cray supercomputer and related workstations.
- Other responsibilities: user administration, operating system installation, resource management, security policies.

## Education

### Ph.D. in Computer Science

West Lafayette, IN, U.S.A.

PURDUE UNIVERSITY

Aug 1996 – Aug 2001

- Thesis title: [Using Internal Sensors for Computer Intrusion Detection](#).
- Advisor: [Eugene H. Spafford](#).

## M.S. in Computer Science

PURDUE UNIVERSITY

- Advisor: [Eugene H. Spafford](#).

West Lafayette, IN, U.S.A.

Aug 1996 – May 1998

## Bachelor's degree in Computer Engineering

NATIONAL AUTONOMOUS UNIVERSITY OF MEXICO (UNAM)

Mexico City, Mexico

Aug 1989 – Jul 1995

- Thesis title: [UNAM/Cray Project for Security in the Unix Operating System](#) (in Spanish, original title: *Proyecto UNAM/Cray de Seguridad en el Sistema Operativo Unix*).

## Languages

- Spanish** native
- English** full professional proficiency
- German** basic proficiency (B1 level)

## Certifications

### AWS Certified Solutions Architect – Professional

AMAZON WEB SERVICES TRAINING AND CERTIFICATION

Since December 2021

### AWS Certified DevOps Engineer – Professional

AMAZON WEB SERVICES TRAINING AND CERTIFICATION

Since May 2022

### AWS Certified Security – Specialty

AMAZON WEB SERVICES TRAINING AND CERTIFICATION

Since October 2021

### AWS Certified Solutions Architect – Associate

AMAZON WEB SERVICES TRAINING AND CERTIFICATION

Since October 2021

### AWS Certified SysOps Administrator – Associate

AMAZON WEB SERVICES TRAINING AND CERTIFICATION

Since February 2022

### AWS Certified Developer – Associate

AMAZON WEB SERVICES TRAINING AND CERTIFICATION

Since April 2022

### Certified Information Systems Security Professional (CISSP)

(ISC)<sup>2</sup>, THE INTERNATIONAL INFORMATION SYSTEM SECURITY CERTIFICATION CONSORTIUM

Since April 2019

### Certified SAgile® 5 Agilist

SCALED AGILE INC.

Since November 2021

### Certified SAgile® 5 Advanced Scrum Master

SCALED AGILE INC.

Since March 2022

## Research

(see “[Publications](#)” for publication reference details)

### Selected research projects at IBM

PHANTOM

2008 – 2009

- Security for VMware virtual environments using virtual machine introspection (based on the [VMware VMsafe API](#)) to provide intrusion detection and prevention capabilities.
- Publications: [\[13\]](#).

- Billy Goat was the first instance of what is today called *honeypots* and *honeynets*.
  - An active worm-detection system, widely deployed (at the time) in the IBM worldwide internal network. It listens for connections to unused IP address ranges and actively responds to those connections to accurately detect worm-infected machines, and in many cases capture the worms themselves. Billy Goat is engineered for distributed deployment, with each device containing standalone detection and reporting capabilities, together with data centralization features that allow network-wide data analysis and reporting.
- Publications: [18, 25]

## ROUTER-BASED BILLY GOAT

2005 – 2007

- An active worm-capture device deployed at the network boundary and coupled with the border router, that allows the Billy Goat to effectively and automatically spoof every unused IP address outside the local network. This makes it possible for the Router-based Billy Goat to accurately detect local infected machines and prevent them from establishing connections to the outside, limiting the propagation of the worms to the outside network.
- Publications: [16]

## SOC IN A BOX

2005 – 2007

- Integrated device containing multiple security tools: intrusion detection, worm detection, vulnerability scanning and network discovery. Precursor to what is today called *Unified Threat Management* systems.

## EXORCIST

2001 – 2002

- Host-based, behavior-based intrusion detection using sequences of system calls.

**Ph.D. Thesis Research**

## USING INTERNAL SENSORS AND EMBEDDED DETECTORS FOR INTRUSION DETECTION

- Study of data collection methods for intrusion detection systems.
- Implementation of novel methods for data collection in intrusion detection systems.
- Analysis of the properties, advantages and disadvantages of internal sensors and embedded detectors as data collection and analysis elements in intrusion detection systems.
- Publications: [11, 19, 20, 27, 32]

**Additional research projects**

## USING AUTONOMOUS AGENTS FOR INTRUSION DETECTION

- Design and documentation of an architecture (AAFID) to perform distributed monitoring and intrusion detection using autonomous agents.
- Implementation of a prototype according to the architecture. This prototype is [published as open source](#).
- Exploration of research issues in the distributed intrusion detection area.
- Publications: [21, 22, 28, 35, 33, 34].

## ANALYSIS OF A DENIAL-OF-SERVICE ATTACK ON TCP/IP (SYNKILL)

- Collaborated in the analysis of the SYN-flooding denial-of-service attack against TCP and in the implementation of a defense tool.
- Publications: [23], awarded the [2020 IEEE Security & Privacy Test of Time Award](#).

## Software Development Projects

**Publicly available software projects:** see <https://github.com/zzamboni/> and <https://gitlab.com/zzamboni>

**Other software projects (not publicly available)**

## PILATUS (IBM)

2005 – 2007

A system installer that allows arbitrary system installation and configurations, allowing for both proprietary and open source components to be installed in an automated fashion. Open source components can be downloaded directly from their original source to avoid distributing them.

## SOC IN A BOX (IBM)

2005 – 2007

A specialized Linux distribution containing multiple security services for integrated security monitoring in small and medium networks. Implementation includes also backend infrastructure components for system installation, configuration and upgrade; and data centralization, analysis and reporting.

A specialized Linux distribution containing multiple sensors for detection of large-scale automated attacks. Implementation includes also backend infrastructure components for system configuration and upgrade, data centralization, analysis and reporting.

A system of sensors for intrusion detection developed in OpenBSD through code instrumentation. Developed as part of my Ph.D. thesis work.

## Honors & Awards

May 2020	<b>IEEE Security &amp; Privacy Test of Time Award</b> ( <a href="#">IEEE S&amp;P page</a> , <a href="#">CERIAS blog post</a> ), IEEE	U.S.A.
2010	<b>CFEngine Champion</b> , CFEngine AS	Norway
Jul 2001	<b>Josef Raviv Memorial Postdoctoral Fellowship</b> , IBM	U.S.A.
Apr 2001	<b>Member of Phi Beta Delta</b> , honor society recognizing scholarly achievement	U.S.A.
Sep 2000	<b>UPE Microsoft Scholarship Award</b> , honor society recognizing scholarly achievement	U.S.A.
Apr 1998	<b>Member of Upsilon Pi Epsilon</b> , the ACM Computer Sciences honor society	U.S.A.
May 1996	<b>Fulbright Scholarship</b> , for pursuing Ph.D. studies at Purdue University	Mexico

## Program Committees and Boards

2011–2013	<b>Editorial Board Member</b> , Computers & Security Journal	
2007–2017	<b>Steering Committee Member</b> , Intl. Symposium on Recent Advances in Intrusion Detection	
2006	<b>Program Chair</b> , 9th Intl. Symposium on Recent Advances in Intrusion Detection (RAID)	Germany
2001–2005	<b>Program Committee Member</b> , Intl. Symposium on Recent Advances in Intrusion Detection	
2009	<b>Program Co-chair</b> , IBM Academy of Technology Security and Privacy Symposium	
2009	<b>Program Chair</b> , ZISC Workshop on Security in Virtualized Environments and Cloud Computing	Switzerland
2008	<b>Program Chair</b> , Detection of Intrusions and Malware & Vulnerability Assessment (DIMVA)	France
2007	<b>Program Committee Member</b> , IEEE Security and Privacy Symposium	U.S.A.
2003–2007	<b>Program Committee Member</b> , Annual Computer Security Applications Conference (ACSAC)	
1994–2000	<b>Program Committee Member</b> , Computer Security Day Conference	Mexico
1994–1995	<b>Founder and organizer</b> , Computer Security Day Conference	Mexico

## Teaching and Advising

### Students

URKO ZURUTUZA ORTEGA, MONDRAGON UNIVERSITY, SPAIN	<i>Ph.D. co-advisor</i>	2005 – 2008
• Thesis: <a href="#">Data Mining Approaches for Analysis of Worm Activity Towards Automatic Signature Generation</a>		
MILTON YATES, ENST BRETAGNE, FRANCE	<i>External Diploma Thesis advisor</i>	2005
• Thesis: <a href="#">The Router-based Billy Goat Project</a>		
CANDID WÜEST, ETH ZURICH, SWITZERLAND	<i>Diploma Thesis advisor</i>	2002 – 2003
• Thesis: <a href="#">Desktop Firewalls and Intrusion Detection</a>		
DANIELE SGANDURRA, UNIVERSITY OF PISA, ITALY	<i>Internship advisor</i>	2009
• Project: Design and implementation of process injection using virtual machine introspection.		
MARTIN CARBONE, GEORGIA INSTITUTE OF TECHNOLOGY, U.S.A.	<i>Internship advisor</i>	2007
Project: Implementation of a proof of concept Hyperjacking attack on Intel platform.		

## Other Professional Activities

1998–	<b>The Association for Computing Machinery (ACM)</b> , Member	
2000	<b>Purdue.pm</b> , the <b>Purdue Perl Users Group</b> , Founder	U.S.A.
1999	<b>Purdue University Chapter of Upsilon Pi Epsilon</b> , President	U.S.A.
1998	<b>Purdue University Chapter of Upsilon Pi Epsilon</b> , Secretary	U.S.A.

- [27] Diego Zamboni. *Doing intrusion detection using embedded sensors— Thesis proposal*. CERIAS Technical Report 2000-21. West Lafayette, IN: CERIAS, Purdue University, Oct. 2000. URL: [https://www.cerias.purdue.edu/apps/reports\\_and\\_papers/view/581](https://www.cerias.purdue.edu/apps/reports_and_papers/view/581).
- [28] Jai Sundar Balasubramanian et al. *An Architecture for Intrusion Detection using Autonomous Agents*. Technical Report 98-05. COAST Laboratory, Purdue University, May 1998. URL: [https://www.cerias.purdue.edu/apps/reports\\_and\\_papers/view/65](https://www.cerias.purdue.edu/apps/reports_and_papers/view/65).

## Presentations at Conferences and Workshops

- [29] Diego Zamboni and Bill Chapman. *Chaos Heidi vs. Orchard: Self-Disruption and Healing in a Cloud Foundry-Based Service Environment*. Presented at the Cloud Foundry Summit Silicon Valley 2016. Presentation: [https://www.youtube.com/watch?v=W4E--kr\\_KE](https://www.youtube.com/watch?v=W4E--kr_KE). May 2016. URL: <http://sched.co/6aQ2>.
- [30] Diego Zamboni and Mark Burgess. *The Future of In-Container Configuration Management*. Invited talk at the 2014 Usenix Configuration Management Summit (UCMS'14). June 2014. URL: <https://www.usenix.org/conference/ucms14/summit-program/presentation/zamboni>.
- [31] Mike Svoboda and Diego Zamboni. *Leveraging In-Memory Key Value Stores for Large-Scale Operations*. Invited talk at the 27th Large Installation System Administration (LISA) Conference. Nov. 2013. URL: <https://www.usenix.org/conference/lisa13/leveraging-memory-key-value-stores-large-scale-operations>.
- [32] Eugene H. Spafford and Diego Zamboni. *Design and implementation issues for embedded sensors in intrusion detection*. Presented at the Third International Workshop on Recent Advances in Intrusion Detection (RAID2000). Oct. 2000. URL: <http://zzamboni.org/files/pubs/sensors-raid2000.pdf>.
- [33] Diego Zamboni. *Building a Distributed Intrusion Detection System with Perl*. Presented at The Perl Conference 4.0. Monterey, CA, July 2000. URL: <http://zzamboni.org/files/pubs/tpc40.pdf>.
- [34] Eugene H. Spafford and Diego Zamboni. "New directions for the AAFID architecture". In: *Proceedings of the Second International Workshop on Recent Advances in Intrusion Detection (RAID99)*. Online proceedings, available at <http://www.raid-symposium.org/raid99/>. West Lafayette, IN, Sept. 1999. URL: [https://www.cerias.purdue.edu/apps/reports\\_and\\_papers/view/3487](https://www.cerias.purdue.edu/apps/reports_and_papers/view/3487).
- [35] Eugene H. Spafford and Diego Zamboni. "AAFID: Autonomous Agents for Intrusion Detection". In: *Proceedings of the First International Workshop on Recent Advances in Intrusion Detection (RAID98)*. Online proceedings, available at <http://www.raid-symposium.org/raid98/>. Louvain-la-Neuve, Belgium, Sept. 1998.

## Invited Talks and Articles

- [36] Mark Burgess and Diego Zamboni. "CFEngine's Decentralized Approach to Configuration Management". In: *InfoQ* (June 2014). URL: <http://www.infoq.com/articles/cfengine-view-on-it-automation>.
- [37] Diego Zamboni. *Security in the Third Wave of IT Engineering*. Keynote talk, presented at the 2011 Computer Security Congress in Mexico City. Nov. 2011. URL: <https://zzamboni.org/post/security-in-the-third-wave-of-it-engineering/>.
- [38] Martim Carbone, Diego Zamboni, and Wenke Lee. "Taming Virtualization". In: *IEEE Security and Privacy* 6.1 (2008), pp. 65–67. ISSN: 1540-7993. URL: <https://ieeexplore.ieee.org/document/4446700>.

- [39] Diego Zamboni. *From Intrusion Detection to Remediation and Beyond: Evolution, Trends, and Research at IBM*. Invited talk at the annual meeting of the Swiss Chapter of the Sigma XI Honorary Scientific Society. Nov. 2006.
- [40] James Riordan, Andreas Wespi, and Diego Zamboni. "How to Hook Worms". In: *IEEE Spectrum* (May 2005). URL: <https://spectrum.ieee.org/computing/networks/how-to-hook-worms>.
- [41] Diego Zamboni. *Intrusion what? From detection to prevention and beyond*. Talk at the Zurich Information Security Center Information Security Colloquium. Dec. 2005.
- [42] James Riordan and Diego Zamboni. "Billy Goat Detects Worms and Viruses". In: *ERCIM News* 56 (Jan. 2004). URL: [http://www.ercim.org/publication/Ercim\\_News/enw56/riordan.html](http://www.ercim.org/publication/Ercim_News/enw56/riordan.html).
- [43] Diego Zamboni. Diez Años de Aciertos y Fallas — ¿Qué Hemos Aprendido y Qué nos Depara el Futuro en la Seguridad? (*Ten years of hits and misses — what have we learned, and what does the future in security hold for us?*) Keynote talk, presented at the 2004 Computer Security Congress in Mexico City. May 2004.
- [44] Diego Zamboni. "Avances en el sistema y arquitectura AAFID para detección de intrusos (Advances in the AAFID intrusion detection architecture and system)". In: *Proceedings of the 1999 Día Internacional de la Seguridad en Cómputo (International Computer Security Day) conference*. Mexico City, Mexico, Oct. 1999.
- [45] Diego Zamboni. "AAFID: Detección de Intrusos usando Agentes Autónomos (Intrusion Detection using Autonomous Agents)". In: *Proceedings of the 1998 Día Internacional de la Seguridad en Cómputo (International Computer Security Day) conference*. Mexico City, Mexico, Nov. 1998.

## Patents

- [46] Carbone Martim et al. "Hardware Emulation Using On-the-fly Virtualization". Granted Patent US 9250942 B2 (United States). Feb. 2, 2016. URL: <https://lens.org/107-038-681-631-856>.
- [47] Jansen Bernhard et al. "Secure User Interaction Using Virtualization". Granted Patent US 8516564 B2 (United States). Aug. 20, 2013. URL: <https://lens.org/012-709-360-909-626>.
- [48] Zamboni Diego M et al. "Detection And Control Of Peer-to-peer Communication". Patent Family of US 8219679 B2 (United States, others). July 10, 2012. URL: <https://lens.org/151-595-773-205-878>.
- [49] Riordan James F, Rissmann Ruediger, and Zamboni Diego M. "IP Network Management Based On Automatically Acquired Network Entity Status Information". Patent Family of US 8055751 B2 (United States, others). Nov. 8, 2011. URL: <https://lens.org/065-534-634-366-763>.
- [50] Duponchel Yann et al. "Methods For Operating Virtual Networks, Data Network System, Computer Program And Computer Program Product". Patent Family of US 7908350 B2 (United States, others). Mar. 15, 2011. URL: <https://lens.org/080-322-567-493-840>.
- [51] Rissmann Ruediger et al. "Network Attack Detection". Patent Family of EP 1866725 B1 (European Patent Office, others). Oct. 20, 2010. URL: <https://lens.org/044-792-433-937-531>.
- [52] Duponchel Yann et al. "Method For Operating Several Virtual Networks". Patent Family of EP 1969777 B1 (European Patent Office, others). Jan. 27, 2010. URL: <https://lens.org/159-743-880-849-911>.
- [53] Swimmer Morton D, Wespi Andreas, and Zamboni Diego M. "Preventing Attacks In A Data Processing System". Granted Patent US 7555777 B2 (United States). June 30, 2009. URL: <https://lens.org/077-245-544-178-974>.
- [54] Schuba Christoph L et al. "Network Protection For Denial Of Service Attacks". Granted Patent US 6725378 B1 (United States). Apr. 20, 2004. URL: <https://lens.org/009-701-089-204-105>.
